## Especialistas en escapes

### *Exhaust system specialist*

**TURBO KIT** se compone de un completo equipo técnico y humano en constante formación, para poder aplicar los más modernos avances tecnológicos en combinación con la seguridad de una sólida experiencia.

En **TURBO KIT** no dejamos nada al azar: todo detalle es estudiado en nuestros bancos de pruebas y procesado mediante sistemas informáticos. Con ello aseguramos el máximo rendimiento y prestaciones acorde a la demanda de los usuarios más exigentes, incluyendo la alta competición.

Por eso tenemos como meta diaria el avance en el estudio de nuevas tecnologías que afiancen la calidad que ha merecido su reconocimiento y elección.

Con este catálogo ponemos a su disposición toda nuestra experiencia y calidad reflejadas en una amplia gama de productos, entre los que está el que usted precisa.

Has a proficient and technical team of professionals which is in constant evolution so as to apply the latest technological advances together with a consolidated experience to provide safety.

At TURBO KIT, we take everything into consideration, that's why every single detail is analysed at our laboratories and processed by our computer systems. In this way, we ensure the best performance of our products in accordance with the requirements of the most stringent users. We also produce exhausts for top competition motorcycles.

For this reason, our everyday target consists in researching new technologies that endorse the quality that our company has achieved thanks to our customers' choice and their acknowledgement of our good work.

In this catalogue, our experience and quality are reflected in a wide range of our products, among which you will find the product that you need.

È composta da un completo staff umano e tecnico in costante formazione, per poter applicare i più moderni progressi tecnologici insieme alla sicurezza di una solida esperienza.

Alla TURBO KIT non lasciamo niente al caso: ogni particolare viene studiato sui nostri banchi di prova ed elaborato o attraverso sistemi informatici. In tal modo assicuriamo il massimo rendimento e prestazioni in grado di soddisfare gli utenti più esigenti, compresa l'alta competizione.

Perciò, ogni giorno la nostra meta è il progresso nello studio di nuove tecnologie che consolidino la qualità che ha meritato il suo riconoscimento e la sua scelta.

Con questo catalogo mettiamo a sua disposizione tutta la nostra esperienza e qualità rispecchiate in una ampia gamma di prodotti, tra i quali si trova quello di cui lei ha bisogno.

Se compose d'une équipe humaine et technique complète en constante formation, pour pouvoir appliquer les avancées technologiques les plus avancées tout en comptant sur l'assurance d'une solide expérience.

Chez TURBO KIT, nous ne laissons rien au hasard : chaque détail est étudié dans nos bancs d'essai et traité dans des systèmes informatiques. Grâce à cela, nous garantissons un rendement maximum et des services en accord avec la demande des usagers les plus exigeants y compris la haute compétition.

Pour cela, notre but quotidien est d'avancer dans l'étude de nouvelles technologies qui renforcent la qualité, laquelle nous vaut la reconnaissance et le choix de nos clients.

Grâce à ce catalogue, nous mettons à votre disposition toute notre expérience et toute la qualité reflétée dans une ample gamme de produits parmi lesquels vous trouverez celui dont vous avez besoin.

Besteht aus einer aus technischen

Fachleuten zusammengesetzten Belegschaft, die sich ständig weiterbildet, um die modernsten technologischen Fortschritte verbunden mit der Sicherheit einer langjährigen Erfahrung anwenden zu können.

Bei TURBO KIT überlassen wir nichts dem Zufall: alle Details werden auf unseren Prüfständen untersucht und die Daten mit Informatiksystemen verarbeitet. Damit sichern wir die maximale Leistungsfähigkeit und mit dem Auftrag der anspruchsvollsten Kunden übereinstimmende Leistungen, wobei der Rennsport inbegriffen ist.

Deshalb haben wir uns den Fortschritt beim Erlernen neuer Technologien, die die Qualität absichern, und die Ihre Anerkennung und Wahl gefunden haben, als tägliches Ziel gesetzt.

Mit diesem Katalog stellen wir Ihnen all unsere Erfahrung und Qualität zur Verfügung, welche sich in der reichhaltigen Produktpalette, unter denen sich das von Ihnen angegebene befindet, widerspiegelt.

Sede de Turbo Kit en Murcia (España), más de 4000m<sup>2</sup>. de instalaciones dedicadas a la investigación, desarrollo y fabricación de sistemas de escape para ciclomotores y motocicletas de 2 y 4 tiempos de cualquier cilindrada.

Cumplimos las más exigentes normativas tanto en la fabricación como en la homologación de nuestros sistemas de escape.

Turbo Kit Headquarters in Murcia (Spain), over 4000m<sup>2</sup>. of installations for research, development and manufacture of exhaust systems for motorcycles, mopeds and 2 and 4 stroke of any displacement.

We met the most stringent regulations in both the manufacturing or the approval of our exhaust systems.

Siège Turbo Kit à Murcia (Espagne), plus de 4000m<sup>2</sup>. des installations pour la recherche, le développement et la fabrication de systèmes d'échappement des cyclomoteurs et motos 2 et 4 heures, de tout déplacement.

Nous respectons les normes les plus strictes à la fois la fabrication et l'approbation de nos systèmes d'échappement.

Der Hauptsitz von TurboKit ist Murcia (Spanien) mit über 4000 m<sup>2</sup> für Forschung, Entwicklung und Herstellung von Auspuffanlagen für 2+4-Takt Motorräder und Motorroller aller Marken.

Turbo Kit sede a Murcia (Spagna), oltre 4000m<sup>2</sup>. degli impianti di ricerca, sviluppo e produzione di sistemi di scarico per motocicli, ciclomotori e 2 e 4 tempi di qualsiasi spostamento.

Ci siamo incontrati più severe norme in entrambi alla fabbricazione o l'approvazione dei nostri sistemi di scarico.

# COMPETICIÓN

## RACING

Estamos presentes en la mayoría de competiciones deportivas, desde las categorías base hasta la competición de alto nivel. Nuestros escapes de calle se benefician de la investigación, el desarrollo y la experiencia en competición.

We are present in most sports competitions, from the base categories to high level competition. Our street exhaust systems benefit from the research, development and experience in competition.

CARBON REEDS

## LÁMINAS CARBON REEDS

Gran resistencia y flexión del material, testado en competición.  
Mejoran la curva de potencia en toda su gama.  
Facilidad de carburación.  
Podemos fabricar cualquier tipo de lámina y espesor.  
Disponemos de un carbono especial para competición.

TIPOS DE LÁMINAS / MODELS

- **STANDARD**
- **BIAXIAL**
- **MAGMALITE**

*Great resistance and flexion of material, tested in competition.  
More power and easy carburation.  
It's possible make anything reeds forms and thickness.  
We have a special carbon for competition.*

# VARIADORES

## VARIATORS

El variador de masas funciona con la fuerza centrífuga al igual que el variador de rodillos. Conseguimos mayor aceleración y velocidad por sus matices técnicos y una mayor duración por la calidad de sus componentes.

### 2 TIEMPOS

Con el variador se suministran un juego con diez masas ligeras y cinco pesadas. Con la combinación de ellas conseguiremos un ajuste idóneo del peso dependiendo de las condiciones del scooter. El mejor ajuste consiste en poner las masas lo más pesado posible siempre que no tengamos una caída de potencia entre los 40 y 50Km/h.

Debemos tener en cuenta que este variador necesita casi el doble de peso que un variador de rodillos.

### 4 TIEMPOS

Se suministra con el peso idóneo para alcanzar unas prestaciones óptimas.

Estos variadores necesitan de un mantenimiento cada 5000 kms, en algunos modelos es necesario cambiar los rodillos y casquillo de bronce para su correcto funcionamiento.

Estas partes consumibles no entran en la garantía del producto.

The masas modifier works with the same centrifugal force as the cylinder modifier. We can achieve greater acceleration and speed by way of its technical touches and a greater duration because of the quality of its components.

### 2 STROKES

Two sets with ten masas light and five heavier. With this combination, we achieve the ideal weight fitting, depending on the conditions of the scooter.

The best fitting consists in making the masas as heavy as possible, as long as there is not a drop in power of between 40 and 50 km per hour.

We should bear in mind that this modifier needs almost twice the weight of a cylinder modifier.

### 4 STROKES

Comes with the ideal weight to achieve optimal performance.

This product need and inspection each 5000 kms, in some models is necessary to replace the gliding rollers and the central bushing. These spare parts are not in the guarantee of the product.

# EMBRAGUE TK CLUTCH

Doble efecto / Double effect

Mayor fuerza de empuje  
Menos deslizamiento  
Menos acumulación de calor por fricción  
Mayor agarre  
Excelente respuesta del acelerador

Super high thrust force  
Less slippage  
Less friction heat build-up  
Stronger engagement  
Excellent throttle response

## TURBOJETk

Optimiza de forma sencilla la inyección de tu moto  
The easiest way to optimise the injection of your bike

### evo

Conecta en el sensor de temperatura del filtro de aire.  
Connect to the intake temperature air filter sensor.

### urban

Conecta en la sonda lambda del escape.  
Connect to the lambda probe in the exhaust.

En las motos de inyección es muy importante la temperatura del aire que se mezcla con la gasolina por eso todas estas motos llevan el sensor de temperatura en el filtro del aire que permite a la centralita original detectar los cambios de invierno a verano, de una zona a otra, etc...

El TURBOJETk te permite regular la mezcla aire/gasolina de tu moto de inyección utilizando como referencia el sensor de temperatura del filtro del aire.

La calidad del TURBOJETk es capaz de detectar diferencias de hasta un grado en la temperatura de entrada.

Regulando el potenciómetro le diremos a la moto que el aire entra mas frío o más caliente por lo que la centralita de la moto modificara el mapa de inyección en proporción de este dato y actuará enriqueciendo o empobreciendo dependiendo de la posición del dial de regulación.

*To fit the TURBOJETk you will need to locate the air temperature sensor (IAT) which is located near the air box on most bikes or behind the dashboard/front headlight on Ducati bikes (please either check your user manual for the location or contact your reseller or DM Meccanica directly if you have any problems). Disconnect the plug connectors which are already attached to the IAT and attach the plug connectors of the TURBOJETk module to the relevant connector of the IAT. The TURBOJETk is now ready to use!*

*As some motorcycles run richer and others are leaner, we suggest that you start by using the TURBOJETk with the dial set to zero and gradually increase the dial to a higher number until you find the setting which is best for your bike.*
